

CLAIM AUDIT

SERVICE

With such low uptake levels of R&D Tax reclaim amongst eligible companies in the UK, it is fantastic that you are aware and have been claiming.

The next question to ask is, am I 100% sure that:

1. My accountant has claimed all of the eligible items and costs allowable under the legislation.
2. They have not accidentally claimed for things that are not allowed, putting you at risk of an investigation by HMRC on your tax affairs.

A good accountant is like a Doctor - they are very good at diagnosing and treating a broad range of conditions. Think of RIFT R&D Tax Credits as a Physio or specialist Chiropractor who is highly experienced in one small field of your business. We work closely alongside your Accountant as their specialist advisor.

Using a specialist such as RIFT R&D Tax Credits, who do this on a daily basis and know exactly what is and isn't allowed, will help you mitigate the risk of investigation, whilst maximising what you are entitled to.

How does the system work?

We will work in a number of ways:

- ✓ We can advise you and your accountant what elements of your business are eligible for R&D and what expenditure should be logged.
- ✓ The team will work with you to gather the necessary information on current activities you are carrying out and guide you on how to maximise the use of the expenditure.
- ✓ RIFT can carry out audits on your previous (2 years) claims and advise if there are additional areas you can maximise.

Benefits of using RIFT R&D Tax Credits

- ✓ Access to specialist consultants
- ✓ Peace of mind that your claims are maximised whilst reducing the risks of HMRC investigations
- ✓ Detailed report to accompany and justify corporation tax amendments
- ✓ Success based fee structure instead of hourly billing

Cost structure

Charges are based on either:

- ✓ success fees for an entire claim, or
- ✓ a pre-agreed fee for a smaller piece of audit work.

The service is fully customisable, the costs are transparent and there are no hidden fees.

Next Steps

Call us to discuss your position and introduce us to your accountant. At the end of the day we need to work closely with all parties to make sure you get the best service.
