

PRE-CLAIM

SERVICE

Research and Development Tax Relief is the UK's number one incentive scheme for business, worth tens of thousands of pounds each year to companies in every sector.

However with all funding schemes there are rules and if you have not fulfilled the minimum criteria you might be ineligible. RIFT R&D Tax Credits Pre-Claim Service is designed to help clients understand these rules and make sure they will be able to claim when the time comes.

Who can use a Pre-Claim Service?

Pre-Claim does what it says on the tin; it helps you before you are ready to make a claim.

- ✓ If you are at the beginning of your research journey and have not even set up a company yet, Pre-Claim will take you through the basics of the legislation and make sure you spend your valuable development capital correctly to maximise the amount you can reclaim.
- ✓ You may have had experience of R&D reclaims in the past but are worried that you are not making the most of the scheme. Pre-Claim will help you throughout the year to squeeze the last little drop out of your expenditure.

We will prepare you throughout the year to make the most of your reclaim.

How does it work and what do you get?

The Team - RIFT R&D Tax Credits has a team of dedicated specialists who understand both business as well as the HMRC legislation. They are able to work with you to establish your needs and make sure you are ticking all of the right boxes.

- ✓ A dedicated consultant - You will have telephone access to a consultant to ask when you are unsure. You are not alone when it comes to dealing with this scheme and the stupidest question is the one you don't ask!
- ✓ Forecasts - Send us details of your expenditure throughout the year - We will be able to tell you what is eligible and what that claim is likely to look like, which will help your budget forecasts.
- ✓ Funding and Other services - Within the commercial ecosystem of our introducer network, we have access to a wide range of specialists who can help you. Lawyers, Insurance companies, Funders, Grant specialists - talk to us and we can put you in touch.

What does it cost?

We believe in "grown-up" business. Charging large fees when companies are trying to grow doesn't help. Hence the pre-claim system is Riffs way of helping you get on your feet - it's free. All we ask is that when you are ready to do your R&D Claim you let us carry on the good work and do the claim for you. Our charging structure works on a success fee basis and takes a percentage of the money we are able to reclaim for you - typically 25% of the benefit.

What next

Call the team at RIFT R&D Tax Credits to discuss your plans and your business and let's start to help you. It's as simple as that.
